

# Your Quick Guide to Left Foot Accelerators & Indicators

Please note this guide only refers to Jeff Gosling products and only lists some of the current, popular vehicles. If your model of vehicle is not listed, please contact us on **0161 430 2151**.

The type of left foot accelerator available for a vehicle is dependent upon the style of OEM accelerator pedal. The below list indicates whether a vehicle would have a twin-folding or electric style left foot accelerator.

Due to the complexities of wiring on some vehicles, to install an indicator switch on the hand control, an interface box is required. The list below indicates whether a vehicle would require an interface box or not with the hand control.

Make/model	Left Foot Accelerator	Indicator Interface Required
<b>Abarth</b>		
595	Twin-Folding	No
<b>Audi</b>		
A1	Twin-Folding	Yes
A3	Twin-Folding	No
