

## Installation Price List

January – March 2022

*This price list provides a guide price for most vehicle models. Where a price range is shown, the exact cost will be dependent on the model of vehicle. Please contact the installer of your adaptations for an exact quotation and their availability to install.*

*Many adaptations ordered via the Motability Scheme at the beginning of a new lease are subsidised and the customer contribution is shown below. Adaptations installed on non-Motability vehicles, or mid-lease on a Motability vehicle, will need to be fully funded by the customer.*

*For funding advice, please visit the funding section of our advice page on the website.*
