

Motability Product Naming List

This list shows the naming given to products and their product categories on the Motability ordering system.

To find the correct product, begin to type the name as shown below into the box provided on the Motability system and the required product will be filtered to reduce the options.

If you are unsure of which product to select, please contact us on 0161 430 2151.

Jeff Gosling Hand Controls Ltd – Stalk Crossover Arm
Jeff Gosling Hand Controls Ltd – Boot Strap
Jeff Gosling Hand Controls Ltd – Panoramic Mirror

Boot Hoists

The boot hoist required is dependent upon the vehicle and mobility device the customer needs to load. We recommend that the customer contacts the installer for them to carry out a compatibility assessment and to confirm the required boot hoist before it is added to the order.

Remote Control Devices

The remote control device required will depend on the options available from the local installer. We recommend that you contact them to discuss their recommend product for the vehicle before it is added to the order.

Ancillary Adaptations

Some ancillary adaptations, such as pedal extensions and extended seat runners, are bespoke to the customers requirements. It is therefore important for the customer to discuss their requirements with their installer before the adaptation is added to the order.
